the future of healthcare

Corey Snow rejoins P&P Data Systems as Senior Implementation Manager

Industry expert returns to P & P Data Systems supporting company's strong growth and product line expansion

TORONTO, CANADA – June 5th, 2008 – P & P Data Systems (www.p-pdata.com), a leading developer of paperless solutions for the medical industry, today announced that Corey Snow, an industry expert has rejoined the company as a senior implementation manager.

"We are delighted to have Corey back," said Moshe Pinhas, President, P & P Data Systems. "He shares our belief that P & P's solutions are the best in the marketplace. Corey's expertise will be invaluable to our clients."

In this role, Corey will be responsible for managing the company's clients through each implementation process as well as setting up and testing all software and data prior to implementation. In addition Corey will manage the company's training initiatives with respect to the numerous hardware and software platforms required to support P & P Data Systems' expanding client base.

P & P's Electronic Records Management Solution is one of the medical industry's most advanced software solutions specifically designed to automate patient records and completely eliminate paper-flow. It is a powerful enterprise-grade engine that drives the process of managing patient care. It frees its users to focus on patient care and having immediate, paperless access to mission-critical information. In so doing it enhances best business practices in the medical community and allows medical clinics and doctor's practices to: increase revenues; promote practice growth; reduce expenses; reduce risk, and improve the quality of patient care.

"Looking forward, I am tremendously excited to have rejoined the company at such a pivotal time in its history," said Corey Snow, Senior Implementation Manager, P & P Data Systems. "In my view, P & P has the best solutions in the marketplace and I have no doubt that the company will be gathering huge market momentum in the medical community and I want to be part of that."

About P & P Data Systems Inc.

Established in Toronto in 1982, P & P Data Systems Inc.'s early vision was to develop systems for physicians to improve and automate their billing processes. Today the company remains dedicated to serving the healthcare marketplace by developing systems that cater to every medical specialty. P & P provides highly skilled trainers and implementation specialists to lead clinical administrative staff into the new world of electronic record-keeping. With P & P's support, medical practices achieve their goals of enjoying cost-effective systems with advanced capabilities. These systems not only increase productivity but also deliver significant economies. For more information, please visit www.p-pdata.com
